

Today’s fast paced world of communications, means keeping up with merging and emerging technologies. You need a single provider capable of translating innovative technologies into practical business applications. ESCO Communications offers:

SECURITY Systems

ESCO Communications utilizes the greatest leading edge security technology to provide solutions for life safety, loss prevention, emergency events, and any type of building/asset and personnel security. From iris recognition access control to behavioral video recognition, ESCO will engineer a system to exceed your expectations. ESCO is a proud member of ASIS, the largest group of International security professionals dedicated to making the world a safer place.

SOUND Reinforcement Systems

ESCO Communications provides the latest technology to meet your needs in audio reinforcement. ESCO has a wide spectrum of audio solutions from voice amplification to high fidelity playback of pre-recorded media. ESCO can engineer audio solutions for small rooms, Houses of Worship, Auditoriums, as well as, large to small sports venues whether it is for audio conferencing or evidence presentation. Our software can determine the best locations for all audio devices to optimize your system’s capabilities.

FIRE & LIFE SAFETY Systems

ESCO Communications offers various fire alarm solutions with the Edwards EST Fire Alarm system. EST is a modular life safety system uniquely designed to meet the needs of any size facility, be it a single panel system or a large multi-panel network. EST’s automated audio system meets applications requiring emergency voice paging and evacuation signaling.

AUDIO/VISUAL Presentations

From basic to the most elaborate presentation audio/visual system ESCO Communications has experience in designing, installing and training users to get the most out of your investment. ESCO carries over 500 different lines of product to customize each application to better meet your specific business/presentation needs. Whether it’s a corporate boardroom, large group instruction area, classroom or courtroom ESCO has the technology and experience to meet your needs.

HEALTHCARE Systems

ESCO Communications can provide services that increase safety and improve the patient experience, as well as, productivity in Healthcare, from acute care to assisted and independent living facilities. Everything from nurse/patient communication, patient flow & safety, wireless communication, locator, anti-wandering, security, access control, infant protection, digital signage and video information systems, ESCO has you covered for all of your Healthcare facilities needs.

DESIGN/BUILD Services

ESCO is very unique in that we have a special design/build team that can help you decide the best possible solution for your needs. ESCO will walk you through every phase of the design/build process, from the idea phase to training you on how to use your newly installed system. ESCO Communications has a dedicated engineering team, as well as, a state of the art CAD department to make sure your solution is designed correctly and will meet your budget before we move forward.

NETWORK Systems

ESCO Communications designs, installs and services total communications and data packages, including Local, Wide Area and wireless data and voice networks. Whether networks are in one location or spread cross-country, ESCO has the expertise to get all communication and data equipment “talking” to each other.
